

Darius Kaler

Law. Business. AI.

I work at the intersection of entrepreneurship, legal practice and software development.

As an attorney and managing director of KALER Rechtsanwaltsgesellschaft mbH, I deal with business decisions through contracts, responsibilities and legal requirements.

As a software founder, I work on how those requirements translate into processes, permissions, interfaces and review. SILCROW and KALINA are part of that practical perspective.

Formats and languages

Keynotes - A focused perspective for conferences and business events.

Workshops - A working session around your organization's questions.

Panels & conversations - Discussion connecting business, law and software.

German and English. Format, duration, travel and recording arrangements are agreed for each event.

An enquiry is not a booking confirmation. Availability and terms are agreed separately.

01 From AI Experiments to Working Business Processes

How to select an appropriate process, define responsibility and evaluate a pilot. A practical way to discuss where AI belongs in the business.

For: Founders, management and operations teams

Audience takeaway: A framework for prioritizing a use case and agreeing on pilot criteria.

02 AI Governance for Founder-Led Companies

Data use, vendor choices, approvals and ownership are connected decisions. This talk explains how to turn them into a usable operating approach.

For: Business leaders, legal teams and professional services

Audience takeaway: A structure for discussing governance decisions with legal and operational teams.

03 Building Software Where Legal Judgment Matters

How requirements around information, responsibility and review influence software design. Drawing on the questions raised by own legal-software projects.

For: Product teams, lawyers and technology leaders

Audience takeaway: A shared vocabulary for connecting legal requirements and product decisions.

For the event briefing

Include the date, location or online format, audience, preferred duration and format, and any recording plans.
